IETF-73
MBONED Working Group

Update on draft-ietf-mboned-3171bis and other related multicast work

Michelle Cotton

michelle.cotton@icann.org

Update since IETF-72

Version 04 of 3171bis available:

draft-mboned-ietf-3171bis-04.txt

Changes since previous versions

❖ Added mention of the option of IPv6 multicast in the introduction

❖ Wording change to Extended AD-HOC section to make mention of RFC 2680

Next Steps

❖ Currently updating version 05 based on feedback received

❖ Summary table improvement (section 3)

❖ Final questions answered
  ❖ Should 224.0.2.0 - 224.0.255.0 become
        224.0.2.0   - 224.0.255.255?

❖ WG Last Call

❖ Begin work on policy document within the MBONED Working Group

Other related work items

❖ Review of IPv4 and IPv6 multicast registries currently converting to XML as source

  ❖ Will contact registrants as part of an annual review and will update contact information

❖ IPv4 Application form to be UPDATED soon

❖ IPv6 Application form to be ADDED soon

(Recently reviewed and approved by multicast expert)

Thank you!

Please send questions and comments

to the MBONED mailing list.
