DHCPv6 Prefix Delegation for NEMO
draft-ietf-mext-nemo-pd-01

Ralph Droms

Pascal Thubert

Review and Status

- DHCPv6 Prefix Delegation for NEMO

  `draft-ietf-mext-nemo-pd-01`

- Leverages NEMO MR/HA to accomplish prefix delegation to MR over DHCPv6

- Revision -01

  Added detail in "Security Considerations" describing protection required for DHCPv6 and a mechanism for protecting traffic between the DHCPv6 relay agent and server.

Discussion Issues

- WG last call on **`draft-ietf-mext-nemo-pd-01`** in progress
  `www.ietf.org/mail-archive/web/mext/current/msg02196.html`

- **`draft-ietf-mext-nemo-pd-01`** defines an extension to DHAAD for location of a HA that will provide DHCPv6 PD service

- Decision on DHAAD at previous meeting this week?

- Alternatives
  - Serial DHCPv6
  - DNS
