GIST over SCTP
<draft-ietf-nsis-ntlp-sctp-05>

Xiaoming Fu,

Christian Dickmann,

Jon Crowcroft

Update since last IETF

- DTLS/SCTP became a TSVWG WG item
- Securing GIST over SCTP becomes clear: DTLS is used to secure SCTP as GIST transport

- Should be ready for WGLC

GIST State Machine
<draft-ietf-nsis-ntlp-statemachine-06.txt, .pdf>

Tseno Tsenov,

Hannes Tschofenig,

Xiaoming Fu,

Cedric Aoun,

Elwyn Davies

Update since last version

- Remove RAO related processing and state management
- Closed the remaining two open issues
  - Issue 1: MA FSM -- Management of MA is still considered, but its FSM is not explicitly presented anymore in order to retain implementation flexibility
  - Issue 2: some detailed functionalities clarified

- Should be ready for WGLC
