# Changes in -02

- Based on excellent review from Richard Barnes (thank you!)
- Mutual TLS not required – what is required is authorization check – TLS against preconfigured list an option
- ACL only includes watchers from other domain
- Added S/MIME Interactions

# Changes in -02

- Added security considerations for presentities
- Changed MIME type for ACL object
- Other clarifications and reorganizations

# Next Steps

- Open Issue – list discussion on alternative mechanism of sending policies
  - Proposal: don't go that way
- Would like WGLC
