Remaining Documents

▌ Service Mapping

  ▌ How to make a diffserv cloud look like an Intserv "Network Element" for different svcs.

▌ RSVP Use

  ▌ Details of using E2E RSVP as signaling when diffserv clouds are in the path.

Service Mapping Document

- Informational or BCP
- Purpose - discuss mechanics of how DS cloud supports specific IS services
  - Choice(s) of PHB and edge behavior
  - PHB resource allocation
  - Generating exported data
- Status:
  - Some previous work - (Guerin, others)
  - Initial authors id'd.
  - More input please.

RSVP Use Document

- Standards Track
- Purpose - define mechanisms needed to support RSVP as E2E signaling protocol with DS clouds in path
  - DSCP marking point negotiation
    - Doesn't exist
  - RSVP message hiding
    - Many cases defined. Some holes
- Status
  - Much text already written in other drafts
  - Need work and writing on open issues
