Framework document update
draft-ietf-ppvpn-framework-02.txt

December 12, 2001

The framework document design team

R. Callon, M. Suzuki, J. De Clercq,
B. Gleeson, A. Malis, K. Muthukrishnan,
E. Rosen, C. Sargor, J. Yu

Summary of Differences
(from -01 to –02)

- Editorial improvements
- Improved descriptions of CE-based and L2 VPNs
- Better alignment with requirements
- Some missing sections filled in

Differences between -01 and –02

- Terminology is updated to align with Req. doc   (all)
- "Range of VPN types" discussion is added   (1.3)
- "Terminology" section is updated   (1.5)
- "Overview of requirements" section deleted   (section 2 of -01)
- Definition of CE is updated (location independent)   (2.)
- Description for L2 PE-based VPNs is updated to coordinate with draft-ietf-ppvpn-l2vpn-00.txt   (2.2.1)
- Interworking discussion for L2 PE-based VPNs is added (2.2.2)
- Interworking discussion for CE-based VPNs is added   (2.3)
- Data exchange at CE-PE added   (3.2)

Differences between -01 and –02 (cont'd)

- "Network Interface and SP Support of VPNs" section is updated to coordinate with draft-ietf-ppvpn-ce-based-00.txt (4.1, 4.2, 4.4)
- LDAP-PERSIST related descriptions are deleted (4.2.1.2)
- Null "Constraining VPN connectivity" sctn deleted (5.2.4 of -01)
- Description for MPLS QoS/SLA is updated (4.3.6.1)
- Description for MPLS frame sequencing is updated (4.3.6.1)
- Overview of IP-in-IP is added (4.3.6.4)
- Null "Managing PE-to-PE backbone networks" section deleted (5.4.4.4 of -01)
- "Interworking Interface" section updated (5.)
- Minor editorial update (many)

Next Steps

- Almost done !
- A section that discuss network management will be added
- Editorial nits / minor terminology improvements
- Final version will be submitted early next year
- Then we go to last call
