draft-ietf-simple-partial-notify-01
draft-ietf-simple-partial-pidf-format-00

IETF#59

Mikko Lönnfors

mikko.lonnfors@nokia.com

Changes (1)

- Old version has been slit into two:
  - draft-ietf-simple-partial-notify-01 specifies the mechanism
  - draft-ietf-simple-partial-pidf-format-00 specifies the format
  - Main idea behind the split is to improve reusability of the format and to improve clarity in the document

Changes in draft-ietf-simple-partial-notify-01

- Added more text into security considerations section
  - Contains now references to presence event package security section as all identified security threads are identical

- Other changes mainly editorial

Changes in draft-ietf-simple-partial-pidf-format-00

- Added more descriptive text how new elements and attribute should be used

- Added Interoperability Considerations section

- Other changes editorial

Open issues

- Now in WG last call

- No major issues identified so far

- Biggest issue seems to be how must document should repeat what presence event package says

- Last call ends 9th of March so there is still time to send comments
