Goals: WGLC Comments (1)

- Editorial nits
 - All accepted
- Clarifications
 - Section 5.2.1: recipient replies in format of the original message - was not discussed
 - Section 6.1 restriction to IMAP extension a pragmatic WG decision whereas 5.1.1 and 5.1.2 are design principles more generally applicable
 - Goals document is a document of historical record - as such reference (section 6.1.1.1) to IMAP channel need not be excised
 - Section 7.1.2: Keypad is rudimentary keyboard: comment accepted
 - Section 8.5: update to most recent MMS architecture not necessary -- moving target -- important only to get proper reference

Goals: WGLC Comments (2)

- Clarifications
 - Poor phrasing -
 - “support existing service as before” => backwards compatible with Internet Mail -- needs rewording
 - “Mobile” not just “wireless” - accept as better term
 - “without intermediation” means “through use of only Internet Mail (IETF) protocols” NOT “no transcoding” -- needs rewording
- Issues related to possible misinterpretation of purpose of Goals doc
 - These driven by desire for definitive “mobile e-mail service” functionality (see appendix [next slide] for list)
 - GOALS document NOT a WG “working” requirements document
 - Rather a historical record of decisions made and their context
 - (capture low hanging fruit - extend Internet mail so that it can be used by mobiles NOT create definitive “mobile e-mail”)
 - Additional functionality and new charter items agreed to by the WG/IESG & rationale for these need to go into a GOALS2 document
 - This document role may need additional clarification in this doc. ???

Thanks to all!

Goals: WGLC Comments (Appendix)

- Proposed additional “mobile e-mail” functionality
 - (perceived as goals doc issues)
 - 1. graceful degradation
 - 2. DRM
 - 3. S2C notification - also inband versus outband notifications
 - 4. e2e security
 - 5. Factoring in support for operators
 - 6. relationship to PIMs
 - 7. e-mail handling of firewalls
 - 8. reference to OMA mobile e-mail service direction and definition
 - 9. positioning with respect to IM
