

RADIUS Mobile IPv4 extensions V.01

Madjid Nakhjiri,
Kuntal Chowdhury,
Avi Lior
Kent Leung

<http://www.ietf.org/internet-drafts/draft-nakhjiri-radius-mip4-01.txt>

Changes from V0

- Mostly identity management issues for MIP versus RADIUS
 - How to ID the user in RADIUS: HoA/ NAI from RRQ
 - How to ID RADIUS client: NAS ID/
- Attributes added to resolve those issues
 - MIP-MN-HoA, MIP-MN-CoA, plus existing user-name
 - MIP-HA-IP address, MIP-FA-IP address, plus existing NAS-ID and NAS-IP
- Added a FA-based case
 - CCoA MNs using FA to register.

Remaining work

- Attribute table to be added in the next rev.
- Next rev as a WG draft?
- Diameter compatibility
