

# manet WG Progress

Joe Macker

March 21, 2006

65<sup>th</sup> IETF, Dallas, TX, USA

## 65<sup>th</sup> IETF manet WG Main Issues

---

- **Update on chartered WG items**
  - Design team updates
  - What has changed in documents?
- Generalized messaging spec progress/use?
- Any other evolving Issues?
- Other Discussions (implementations, IANA issues,etc)
- Related/Coordinated Work
  - Manet-OSPF
  - autoconf

## Document Progress on WG items

---

- Reactive Unicast Protocol
  - DYMO
  - draft-ietf-manet-dymo-04
- Proactive Unicast Protocol
  - OLSRv2
  - draft-ietf-manet-olsrv2-01
- Simplified Multicast Forwarding
  - SMF
  - draft-ietf-manet-smf-02
- Generalized MANET message/packet format
  - draft-ietf-manet-packetbb-00

## Generalized Message Spec

---

- Opportunity to improve future convergence and protocol usage
- Common engineering approach
- Is this serving the purpose of Design Teams?
  - DYMO, OLSRv2, SMF
- Is there a common core set?
