

IP Flow Information Exchange (IPFIX) Testing

draft-schmoll-ipfix-testing-00.txt

C. Schmoll

P. Aitken

Fraunhofer Fokus

Cisco Systems

Motivation

- List of tests which implementers of IPFIX compliant systems are encouraged to perform
- ...based on the tests performed during the two past Interoperability Events
- This document has been created to help implementers test the functionality of their IPFIX exporter and/or collector component.
- The goal of these tests is to ensure that all important functions are covered by tests

Planned for -01

- Include examples for most common fault situations
- Definition of specific corrupt test packets for stress testing
- More detailed test cases
- Updates to reflect protocol changes
- Next version: August 2006
