

IPFIX Mediation: Framework

How to proceed with the 'Mediation Framework' draft

Atsushi Kobayashi and Haruhiko Nishida (NTT)

How to progress Framework draft

- Mediation Framework draft will be mainly based on the mediator-model draft.
 - Main work will be started after problem statement draft achieves the WG draft.
 - -01 version has changed a little bit, and removed overlap parts between the problem statement draft.
- Other application drafts regarding IPFIX Mediation will be progressed individually.
 - An application which can be hosted in both IPFIX Mediator and Original Exporter are separated from Framework draft.

Overview of Framework draft

☐ Table contents

■ IPFIX Mediation requirements

➔ Should be based on the feedback of Problem statement draft .

■ IPFIX Mediator basic component model
