

CPE Default Route Detection

G. Van de Velde, **J. Brzozowski**,
S. Miyakawa

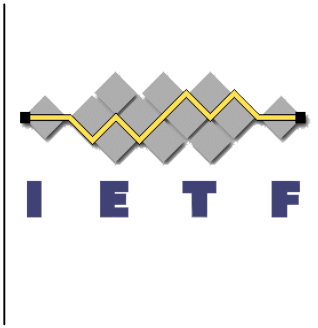

IETF 71, March 11/13th 2008
Philadelphia

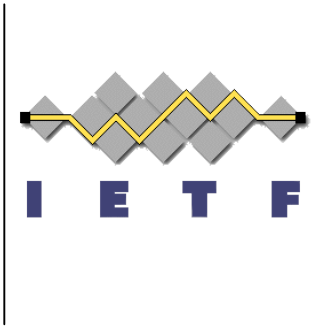

Problem

- Combination host/router CPE needs to be able to determine/detect default route
 - Host only and router only behavior are specified elsewhere

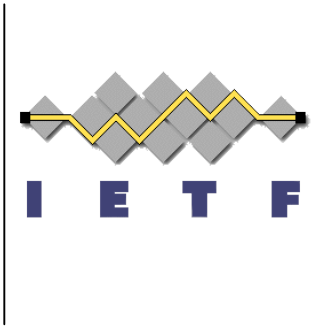

Objective

- Informational document to identify potential ways this problem could be addressed using:
 - Router advertisements
 - DHCPv6
 - Other
- Consider other ways this could be done
- Not to specify the actual mechanics of how this would work - yet

Next

- Combine this work with other similar or related efforts (or not)?
 - Route injection
 - Route maintenance
 - Other
