IETF-80, ALTO WG, 2011-03-31

Document Status

- `draft-ietf-alto-reqs-07` (published 2011-01-24)
  - Lots of document cleanup
  - Move non-requirements text to `draft-ietf-alto-deployments`
- WGLC on -07 from 2011-02-10 to 2011-02-25

WGLC outcome (1)

- Thanks for extensive review to
Richard Alimi (Editor `draft-ietf-alto-protocol`)

- Thanks for additional reviews to
  - Nico Schwan Michael Scharf (Co-Authors 3pdisc draft)
  - Reinaldo Penno (Co-Author ALTO&CDN draft)

- The draft generally is in a good shape

- The reqs are in-line with the protocol and discovery work
  - No unfulfilled reqs or additional reqs,
nor other conflicts have been identified

WGLC outcome (2)

- The reqs won't harm the still young CDN work
  - It can be hardly imagined that the reqs will be in conflict with future CDN use cases and solutions
  - If they come up with (CDN-specific) additional reqs they should document them in their drafts.
- Lots of spelling, grammar, and nits were fixed in `draft-ietf-alto-reqs-08` (published 2011-03-14)
