## Updates from the last version

- New requirement added to align with the solution draft: In Section 2.1.6. Signal Processing Capability Restriction
  - The PCReq Message MUST be able to specify restrictions for signal compatibility on the endpoint. The following signal processing capability should be supported at a minimum:
    - Modulation Type List
    - FEC Type List

# Summary & Next Steps

- Stable now
- The solution draft revision has been published (02)
- Ready for WC LC
