

CLUE Signalling

IETF 92

Changes in -05

- SRTP/DTLS made mandatory for CLUE-controlled media lines.
- IANA section added based on text proposed by Christian Groves
- Includes permission to use same encID label value on multiple m-lines for m-lines of dependent streams
- Syntax improvements

Since then

- Comments by Christian Groves, Paul Kyzivat
- Main outstanding issue: need to update negotiation details to use *draft-ietf-mmusic-data-channel-sdpneg-01* to negotiate data channel
 - Use of *draft-ietf-mmusic-data-channel-sdpneg-01* plan of record as of IETF 91
- Other, more minor issues identified

Next steps

- Produce version -06 with identified issues fixed
- WGLC?
