Rapporteur, Q.10/17Email: abarbir@live.ca

In the spirit of collaboration and harmonization of our respective work, ITU-T SG 17 is pleased to inform you about current work of Question 10/17 in the area of identity management and privacy. (Refer to the attached summaries of the Recommendations under development by Q.10/17).

In particular, we are pleased to inform you that SG 17, at its April 2010 meeting, has approved Recommendation ITU-T X.1252, *Baseline identity management terms and definitions*..

Also at this SG 17 meeting, draft Recommendation X.1275, *Guidelines on protection of personally identifiable information in the application of RFID technology* was re-determined for approval. And X.priva, *Criteria for assessing the level of protection for personally identifiable information in identity management* was updated.

The above documents are attached for your information.
