Q.7/13 acknowledges the cooperation between our two working groups on matters of common interest.

Q.7/13 has noticed that in section 2.1 (Pseudowire Type) of the latest version of the PWE3 IANA allocation draft “draft-ietf-pwe3-iana-allocation-09.txt”, pseudowire type values have not been allocated for Y.1414 (Voice services – MPLS network interworking).

In particular, of the three modes defined in Y.1414, two utilize pseudowire procedures, namely the mode defined in clause 10 (Voice over MPLS using AAL type 2 SSCS for narrowband services) and that defined in clause 11 (Voice over MPLS using MPLS Forum IA 1.0).

We would like to ask the PWE3 WG to update this document to accommodate these modes.

As always, we would appreciate your keeping us informed as to your progress.

SG 13 will meet again in Geneva, from 29 August to 9 September 2005.
