OIF OPTICAL INTERNETWORKING FORUM

May 17, 2005

Mr. Sam Hartman, hartmans-ietf@mit.edu, IETF, Security Area Director
Mr. Russell Housley, housley@vigilsec.com, IETF, Security Area Director
Mr. Chris Lonvick, clonvick@cisco.com, IETF, Syslog Working Group Chair

Dear Chris, Sam, and Russell,

At the OIF meeting held April 11-14, 2005, the OIF continued work in progress on an Implementation Agreement for *OIF Control Plane Logging and Auditing with Syslog.*

Attached for your information is the updated draft of the *OIF Control Plane Logging and Auditing with Syslog* Implementation Agreement, which specifies how to use syslog to log OIF control plane traffic as a basis for an auditing capability. It is based on the most recent syslog-protocol, syslog-transport, and syslog-sign drafts.

We look forward to and encourage continued progress on the Syslog Internet Drafts at the IETF. Therefore, we have also attached comments on draft-ietf-syslog-protocol-10.txt and draft-ietf-syslog-transport-udp-03.txt.

In the continued interest of cooperation we would appreciate comments on our syslog work in the OIF.

We look forward to continued cooperation with the IETF.

Sincerely yours,

James D. Jones

Jim Jones
OIF, Technical Committee Chair
