

February 4, 2005

Mr. Sam Hartman, hartmans-ietf@mit.edu, IETF, Security Area Director
Mr. Russell Housley, housley@vigilsec.com, IETF, Security Area Director
Mr. Chris Lonvick, clonvick@cisco.com, IETF, Syslog Working Group Chair

Dear Sam, Russell and Chris,

At the OIF meeting held January 18-21, 2005, the OIF continued work in progress on an Implementation Agreement for *OIF Control Plane Logging and Auditing with Syslog*.

Attached for your information is the updated draft (oif2003.119) of the *OIF Control Plane Logging and Auditing with Syslog* implementation agreement, which specifies how to use syslog to log OIF Control Plane traffic as a basis for an auditing capability. It is based on RFC 3164, the syslog-sign draft, IPsec and syslog.conf.

We look forward to and encourage continued progress on the syslog-sign draft at the IETF. If the plans for this document, as listed in the current Syslog charter, are likely to change we would appreciate an update.

In the continued interest of cooperation we would appreciate comments on this work. It would be appreciated if you would consider pointing out the existence of this work to participants on the syslog or saag list and respond with a synthesis of any comments.

We look forward to continued cooperation with the IETF.

Sincerely yours,

A handwritten signature in black ink that reads "James D. Jones". The signature is written in a cursive, slightly slanted style.

Jim Jones
OIF, Technical Committee Chair
