Subject: SRTP Roll Over Counter Dependency

Dear Thomas, Cullen and Jon,

3GPP2’s X.S0022-A specification has adopted a solution that is the same as that described in draft-lehtovirta-srtp-rcc for Secure RTP Roll over counter (RoC) synchronization at the 3GPP2 March 2006 meeting in Dallas, TX. The specification is targeted for publication in July 2006.

Furthermore, we understand that 3GPP adopted the same solution, and consequently, OMA BCAST also uses the same technique for SRTP RoC synchronization.

Thus draft-lehtovirta-srtp-rcc is essential for the timely publication of 3GPP2 X.S0022-A specification. We think that this work is independent of the SRTP key management work in progress in the rtpsec mailing list, and thus, we request the RAI chairs to process this document quickly. Many thanks for your consideration.

Regards,

AC Mahendran  
3GPP2 Liaison to IETF
