20 **Subject: MIP6 Bootstrapping Solution For The Integrated Scenario**
21

22 Dear Thomas, Jari and Mark,
23

24
25 3GPP2 has analyzed the Mobile IPv6 bootstrapping solutions for the integrated and split
26 scenarios that are being defined in IETF. 3GPP2's network architecture model is aligned with the
27 integrated scenario. The Access Service Authorizer (ASA) and the Mobility Service Authorizer
28 (MSA) are the same entity in 3GPP2's wireless IP network architecture. Therefore, we have
29 adopted the mip6 bootstrapping solution described in draft-ietf-mip6-bootstrapping-integrated-
30 dhc-01.txt.
31

32
33 All the documents related to the use of mobile IPv6 in the 3GPP2 network are based on the
34 integrated scenario model. Therefore, draft-ietf-mip6-bootstrapping-integrated-dhc-01.txt is
35 necessary for the timely publication of the 3GPP2 MIPV6 Enhancement (X.P0047) and WLAN
36 Interworking (X.P0028-200) specifications. We request that the Internet Area chairs process this
37 document as soon as possible. Many thanks for your consideration.
38

39
40 Regards,
41
