Thank you for your liaison titled: Review of the MPLS-TP OAM Requirements draft" (ref # 003.01) requesting ITU-T SG15 experts to indicate approval for progressing the OAM requirements document based on its previous review of draft-ietf-mpls-tp-oam-requirements-02.txt.

The ITU-T SG15 experts support approval of the current draft including the minor editorial fixes received during IETF WG last call as documented in draft-ietf-mpls-tp-oam-requirements-03.txt

Some sector members expressed a concern that the requirements are not complete. However, we could not reach agreement on these additional requirements.

If after approval of this document ITU-T SG15 experts agree on additional OAM requirements, these will be sent to IETF via liaison statement and documented in an Internet-Draft according to the MPLS Change Process described in RFC 4929.
