During SG 13 meeting (Geneva, Oct. 28 - Nov. 8 2002), activities related to the management of the ITU-T IP project have been achieved in WP 1/13. The version 6 of the IP Project description document has been updated on the basis of liaisons coming from concerned SGs, which have all been endorsed by SG 13.

SG 13 appreciates that Study Groups actively collaborate on updating the IP Project description document which provides the state of ITU activities on IP to the telecommunication community.

Please note that a description text has been provided for the area 13 of the IP Project entitled "Utilization of IPv6 in telecommunication networks". It is reminded that decision to introduce area 13 in the IP Project had been taken by SG 13 in February this year.

The new version of the IP Project description document is now version 7. It is provided on the ITU website for the IP Project, <http://www.itu.int/ITU-T/studygroups/com13/ip/index.html>
