([bill.wu@huawei.com](mailto:bill.wu@huawei.com))

Benoit Claise, IETF NETCONF Data Modeling Language (netmod) Area  
Director ([bclaise@cisco.com](mailto:bclaise@cisco.com))

From: MEF Forum

The MEF wants to communicate that MEF has approved a re-scope of a project to develop YANG models for MEF services. A copy of that re-scope is attached.

We request that you review the re-scope, and determine any overlap with your work. We look forward to feedback from you on this subject.

The MEF Technical Committee meets next in Scottsdale, AZ in January 25-28, 2016.
