Date: 19 November 2015

Subject: Achieving Packet Network Optimization using DWDM Interfaces (WT-319 Part B)

Reference: bbf2015.1209

Dear IETF Routing Area and Working Group Leaders:

Thank you very much for your timely response to our last liaison concerning our document WT-319 Part B, *Achieving Packet Network Optimization using DWDM Interfaces – Physically Separated, Logically Separated*. We understand the time constraints you faced with IETF94. We appreciate your effort to send us preliminary feedback on the document despite these constraints and your kind offer to do a thorough technical review of our document. We respect the expertise of the IETF Routing Area and graciously accept your offer.

We discussed and addressed your preliminary feedback in our recent Puerto Vallarta meeting (Nov 16-20). Attached, please find an updated version of the document for your review and comment.

Our next meeting is February 1-6, 2016 in Hong Kong. If possible, we would appreciate your

response by January 25, 2016 to help us prepare for our meeting. Please let us know if this time frame is insufficient.

We want to again express our appreciation for your continued consideration and support with this important topic.

Sincerely,

Michael Fargano,
Broadband Forum Technical Committee Chair
