ITU-T Study Group 13 would like to inform you that we are starting a new work item on “Metadata framework for cloud service lifecycle management (Y.cslm-metadata)”, which could be found in the attachment.

This draft Recommendation provides the metadata framework for cloud service lifecycle management in the closed-loop automation environment by specifying general description of metadata, metadata functions, and metadata applicability in cloud service lifecycle management.

We would like to receive your comments and collaboration on the future works on this Recommendation, and hope you can share your related works with us if you have similar studies in this area.

**Attachment:** TD26 (WP2/13), Proposed NWI - “Metadata framework for cloud service lifecycle management” (Y.cslm-metadata)
