Keywords: IP/MPLS; ICMP traceroute

Abstract: This LS aims to inform ITU-T SG13 and IETF that SG11 starts a new work item Q.joint_tr.

ITU-T Study Group 11 would like to inform SG13 and IETF opsawg WG that during Q13/11 meeting (virtual, 17-26 March 2021), it was agreed to start one new work item: draft Recommendation Q.joint_tr "Requirements and Reference Model for optimized traceroute of joint IP/MPLS", which aims to specify the Requirements and Reference Model for optimized traceroute of joint IP/MPLS. This work is essential and useful for network management through providing a beneficial OAM tool. The baseline text is contained in SG11-TD1604/GEN.

SG11 would like to receive your comments and look forward for further collaboration on this draft Recommendation, and hope you can share your related works with us if you have similar studies in this area.
