From	MEF Forum

We would like to inform you about the publication of Standard MEF 84 Network Slice Service and Attributes.

This standard specifies Network Slicing in the context of MEF Lifecycle Service Orchestration (LSO) and MEF Services. Key concepts of Network Slicing, Network Slices and Network Services are described. Network Services as defined in this Standard enables Service Providers to offer Network Slices in the Service Provider domain as Services to Subscribers in the Customer domain. The focus is on the Subscriber visible aspects of the Service Provider's internal Network Slices.

MEF Standards are available at: <https://www.mef.net/learn/mef-technical-standards-sdks/>

The forthcoming MEF meeting will be held 24–27 January 2022.
