Purpose: For information

1. Description

The IETF Transport and Services Working Group (TSVWG) [1] has prepared the following drafts and included previous inputs from the 3rd Generation Partnership Project (3GPP) on topics relating to Explicit Congestion Notification (ECN):

- draft-ietf-tsvwg-ecn-encap-guidelines [2]
- draft-ietf-tsvwg-rfc6040update-shim [3]

These drafts have been revised in IETF Review and are now thought ready to be published. The drafts mention the GPRS Tunnelling Protocol (GTP), which is under the control of 3GPP, and clarify that GTP is in scope of RFC6040.

The drafts are currently in the RFC-editor queue. 3GPP was involved at the start of the process; therefore, TSVWG thought it may be useful for 3GPP to be notified of the conclusion.

2. Upcoming Meetings

IETF 119 16-22 March 2024, Brisbane, Australia

IETF 120 20-26 July 2024, Vancouver, Canada
