

# Internet Assigned Numbers Authority (IANA) Plenary Report

IETF 124, Montreal

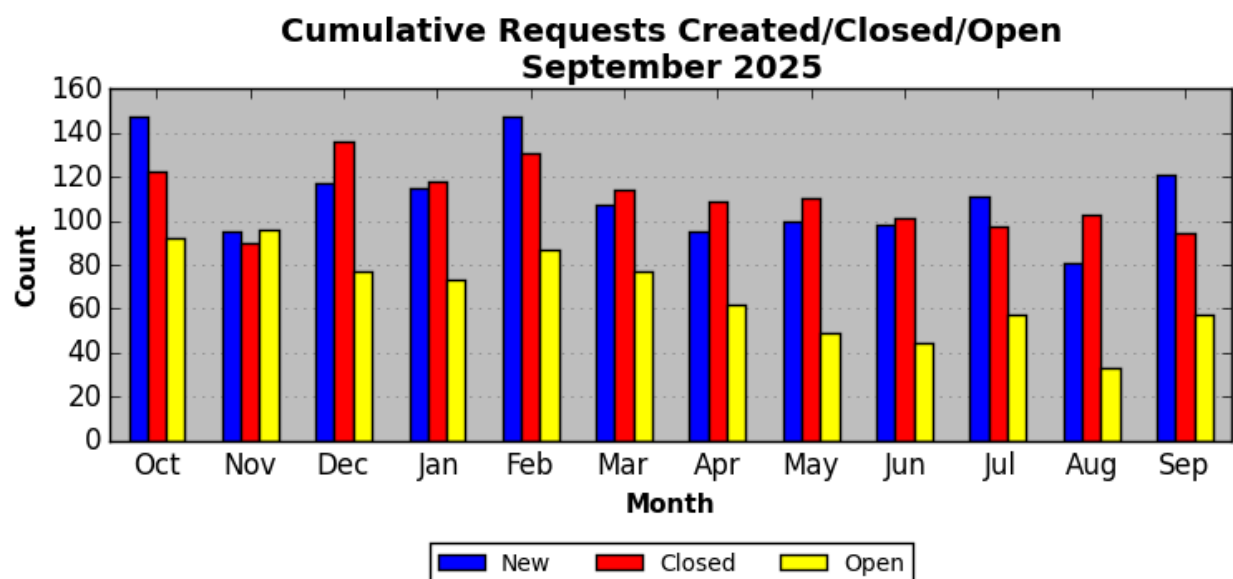

## Key Highlights and Milestones

- IANA met or exceeded all service-level agreements for protocol parameter functions from July 2025 to September 2025.
- More than 900 IETF-related requests have been processed since IETF 123. These include document reviews, registry creation, new registrations, modifications to existing registrations, and deletions.
- Created 18 new registries and three registry groups (reflected as new unique registry URLs) since IETF 123.
- Reviewed IANA Considerations for all downloadable documents on the IETF 124 WG agendas (posted by Monday, October 20th at 5:00 PM).

## Overview of Activities

Performance in brief

**Last 12 months (i.e. October 2024 – September 2025)**

\*Does not include Private Enterprise Number (PEN) Requests

More comprehensive monthly statistics reports can be found at <https://iana.org/performance>

## Since IETF 123

Request Type	Total
Last Calls	41
IESG Evaluations	71
RFC Publication Approvals	58
Media Types	20
Ports and Port Modifications	20
New Private Enterprise Numbers	519

## Customer satisfaction in brief

At the conclusion of request processing, IANA sends a short survey to customers to ask them whether they were satisfied with our performance. These are only issued for requests directly sent to IANA (i.e. not through the RFC editorial process), and no more than one survey is sent per customer every 60 days even if they conduct multiple transactions.

	June	July	August	September
Response Rate	56%	50%	50%	46%
Satisfaction	100%	100%	100%	100%

## Updates and initiatives

- IANA is participating in the discussions in the Update to IANA Considerations (ianabis) working group. To facilitate this discussions we have authored three drafts:
  - draft-ietf-ianabis-rfc8126bis-00
  - draft-baber-ianabis-early-registries-00
  - draft-baber-ianabis-rfc7120bis-01
- We have been working to enhance how we publish our registry data. As part of these improvements, we plan to introduce JSON as a new format for machine-readable data. Preliminary draft versions of these exports, intended solely for review and feedback, are now available at <https://beta.iana.org/protocols>. We've also shared an announcement on the

ietf@ietf.org mailing list to invite feedback. If you didn't receive that email, you're welcome to contact us at [beta-feedback@iana.org](mailto:beta-feedback@iana.org) with any questions or comments.

## Additional information

- IANA will maintain “office hours” during IETF 124. Look out for our booth, and bring any questions you may have about your Internet Drafts, how registries operate, or anything else IANA-related.
  - Our booth will be manned Monday through Thursday, from 9am to 5pm
  - If we've stepped away, or you're attending remotely, you can always drop us a note at [iana@iana.org](mailto:iana@iana.org), and we will follow up with you
- We always encourage authors to speak with us about their prospective IANA registrations early in the document development process. Send questions and requests for early document reviews to [iana@iana.org](mailto:iana@iana.org)
- Our index of protocol parameter registries can be found at <http://www.iana.org/protocols>
