- Reminder: [AUTH48 archive](#) available
- Non-ASCII allowed in `<t>` (without `<u>`) in some cases

From the [Online Portion of the Style Guide](#):

The `<u>` element is required for cases where the non-ASCII characters are needed for correct protocol operation.

Example of `<u>` output: "ψ" (HEBREW LETTER SHIN, U+05E9)
IETF 114 Workshop on Using GitHub during AUTH48

Summary

Description of next experiment:

If you have a document that:
• matches the criteria
• will be entering the queue
• and you and your coauthors want to participate
• please let us know by sending email to rfc-editor@rfc-editor.org

Will hold another workshop on this topic after completion of the next few experiments.

Reminder: Tools Modernization (ongoing)

RFC Production Center Tools Modernization Project

A new tool chain to support editing and publishing end to end is needed

Jean Mahoney will be doing the following in her role as project manager:

- Creating the specification for the new tool chain
- Helping the RPC decide their preferred modernization path
- Managing tool chain development, implementation, testing, and training
