

draft-ietf-dots-architecture-05

A. Mortensen, N. Teague, F. Andreassen,
T. Reddy, R. Compton, C. Gray

Changes since -04

- End-to-end scrub of document complete
- Data channel optionality
- Editorial fixes and rewordings

NAT considerations

- DOTS client signaling from RFC 1918 address through NAT
- Mitigation for privately addressed services publicly available through NAT?

Remaining work

- Only open issue is request for NAT considerations section
- One pull request proposing addition of an appendix covering multi-homing
- Authors believe draft ready for WGLC after addressing above issues

Thank you
