March, 2018

# What's about the latest version?

- 0 Change the type of attachment circuit to if:interface-ref
- 0 Updated ethernet segment's AC/PW members to accommodate more than one AC or more than one PW
- 0 Added the new preference based DF election
- 0 Referenced pseudowires in the new ietf-pseudowires.yang model
- 0 Moved model to NMDA style specified in [draft-dsdt-nmda-guidelines-01.txt](#)
  
- 0 Incorporated ietf-network-instance model on which ietf-l2vpn is now based
- 0 Modified the operational state augment
- 0 Renamed evpn-instances-state to evpn-instances
- 0 Added vpws-vlan-aware to an EVPN instance
- 0 Added a new augment to L2VPN to add EPVN
- 0 pseudowire for the case of EVPN VPWS
- 0 Added state change notification
