

Cache Digests for HTTP/2

Kazuho Oku

Yoav Weiss

Changes in draft-05

- **removal of stale support #516, #517**
 - voice to revert the change
 - use-case: REST API that pushes a collection of items missing on the client
- **editorial #503, #526**

Open Issue

- Eliminate requirement that the digest size is a power of 2 #607
 - actually talks about choosing the best digest algorithm
 - that meets the requirements of the browsers and also compact
 - Yoav is continuing his research
