ROLIE Document Status

ROLIE Core

- Published!

ROLIE Discovery

- DNS-SD testing implementation functional

- Time to standardize using lessons learned. (Service names, etc)

ROLIE CSIRT

- Document mostly mature

- HOWEVER...

New Audiences

- STIX-driven threat sharing audiences interested, no entry point for them.

- Split CSIRT into IODEF and STIX drafts
  - Text largely complete, relatively quick activity

Scope and Charter

- STIX draft would be out of scope of current MILE charter

- Re-charter to include ROLIE extension work

New things

- ROLIE JSON
  - Work progressing as per decision last WG meeting

- ROLIE Vulnerability
  - CVE, (maybe) references to ROLIE STIX document, etc
