

DNSSD Working Group

Road Map Document Status

Stuart Cheshire, Apple

103rd IETF, Bangkok, November 2018

Service Discovery Road Map

Changes in draft-2 & draft-03

Latest revision: draft-cheshire-dnssd-roadmap-03

General wording improvements

Additional text about difference between browsing to discover list of instance names, and resolving one specific instance name to address and port number

Text about supporting asynchronous notification of: data creation, update, and deletion

Clearer explanations and subsections in Appendix A
(IETF Terminal Room Printer Discovery Walk-Through)

Service Discovery Road Map

Next Steps

Intent is for this to be a living document, evolving to catalog other related drafts

No current expectation of RFC publication

Does Working Group want to adopt this?
