

October 2018  
IDR Working Group – Interim Meeting

# **draft-bashandy-isis-srv6-extensions-04**

Peter Psenak, Clarence Filsfils (Cisco Systems),  
A. Bashandy(Arrcus), B. Decraene (Orange),  
Z. Hu (Huawei)

# Changes from the previous version

- Stable, only minor changes:
- Clarifying the advertisement of supported Algorithms
  - Use of SR Algorithm TLV as defined in [ietf-isis-segment-routing-extensions](#)
- END.DX6, END.DT6 SIDs have been removed
  - No use case documented for these at the moment
  - If the use case is found and documented we may add them back

# Next Step

- Implementations available
- WG adoption
