Since IETF102

ANIMA and ACE

Notes

- The BRSKI draft passed WGLC, received three large reviews,
 - See https://github.com/anima-wg/anima-bootstrap/blob/master/ietf-presentations/ietf104_summary.pdf
 - BRSKI-19 answers all review and WGLC issues, and is now ready for the IESG.
- The constrained voucher document was adopted, and received significant work, and is now constrained voucher + constrained BRSKI.
- The EST-COAPS document is in WGLC, but has passed.
- EDHOC still has no home, but went through a secdispatch virtual interim at the beginning March.

ietf-6tisch-dtsecurity-zerotouch-join

- Status
 - -03 refreshed in October 22, expires in April
 - Lost co-author! Looking for help.
- Document needs a thorough revision now that dependancies are stable.
 - Document will get significantly shorter.
 - Still depends upon EDHOC.
- Next steps
 - Today's state: "WG Document"
 - Needs a co-author! "**Your name here**"

Requires draft-ietf-6tisch-enrollment-enhanced-beacon-01, which is a WG document, and many think is ready for WGLC.

6tisch constrained bootstrap evolution
