

# Client Hints

HTTP WG - IETF 105

# No major draft changes since IETF 104

- A few PRs in-the-air

# Issues to discuss

- [`Sec-CH` prefix](#)
  - Objections to creating a new namespace
- [Move to Structured Headers](#)
  - Any objections?
- [Active vs. passive fingerprinting](#)
  - CH would make it harder to track how the data is used?
- [Exposure to CDNs](#)
  - Are CDNs part of the threat model?

## HTTPSSVC - to solve the first view problem?

- PR to add a [Client Hints Alt-Svc extension](#)

# Moving forward?
