# Status Update

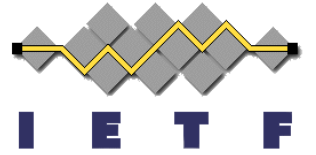

- Draft version 5 was submitted on 3-24-20
  - Version 6 will be submitted soon
- Draft submitted to IESG
- Received comments from Boris Hassanov
  - Incorporated all feedback in version 6

# Status Update – Version 6

## Updates

- Added text to cite examples in Section 6.1.1
- Added text in 6.2 to cite an example of constrain peering model between spine and leafs
- Added text in 6.2 to talk about prefix aggregation
- Augmented text in 6.5.3 to cover other devices in addition to controller that can be used for fabric data path validation

Thank you
