Note Well

- Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:
  - the IETF plenary session,
  - any IETF working group or portion thereof,
  - the IESG, or any member thereof on behalf of the IESG,
  - the IAB or any member thereof on behalf of the IAB,
  - any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices,
  - the RFC Editor or the Internet-Drafts function
- All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879).
- Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details. Please consult RFC 3978 (and RFC 4748) for details.
- A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.
- A participant in any IETF activity acknowledges that written, audio be made and may be available to the public.

199

- Token: Document Author
- Many comments from IESG, ranging from nits to discuss-level concerns.
- Need a new version of the document that more clearly spells out the conditions under which the mechanism is helpful.

Location Conveyance

- Token: Document Shepherd
- New revision available last month.
- Author believes that all comments (including WGLC) have been addressed in current document.
- Waiting for final document shepherd write-up for publication request (being shepherded by former SIP WG chair for historical reasons).

Re-INVITE

- Token: SIPCORE Chairs
- WGLC finished on March 8th.
- Author believes new -03 version addresses all WGLC comments.
- Chairs will be requesting publication shortly.

INVITE Fix

- Token: SIPCORE Chairs
- WGLC concluded January 31st.
- New version of document reflecting minor updates issued March 8th.
- Chairs will be requesting publication shortly.

Example Security Flows

- Token: Document Author
- Dedicated review completed by Ben and Vijay (Thanks!).
- Some technical comments on list late January/early February, to be reflected in next version of document.
- Document needs updates to generated SSL-content.
- Author expects new version addressing all comments early summer. Will WGLC when new version comes out.

Keep-Alives

- Token: SIPCORE Working Group

- Virtually no discussion on mailing list (and absolutely none this year).

- Does the working group still support publication of this work?

- If we don't remove this from the charter, we'll be going into WGLC in the next week or two. A decision whether to publish will be based on level of WGLC participation.

SIP Events Rate Control

- Token: SIPCORE Chairs
- WGLC Ended Feb 21st.
- New version released Feb 22, believed to address all outstanding issues.
- Waiting on chairs to perform proto writeup and request publication.

Presence Scaling Requirements

- Token: IESG/SIMPLE WG
- SIPCORE is done with this work.
- Publication is still pending on draft-ietf-simple-interdomain-scaling-analysis security clarifications.
