Next Hop Resolution Protocol MIB

Presented By: James V. Luciani

Ascom Nexion

Status

- **Maria Greene and Jim Luciani received the current MIB document last month from Avri Doria**
- **We are looking at basing at least part of the NHRP MIB on the Classical IP MIB**
  - This promises to aid in modeling of co-resident ATMARP and NHRP environments
- **Current plan is to provide a MIB at the next IETF meeting**
- **We have received several very helpful suggestions regarding MIB structures and content**
  - Input is ALWAYS welcome!
- **Some re-evaluation needs to be done to accurately represent the possible use of the LAG model by an NHRP**
