Milestones

- Done** Submit drafts of standard metrics for connectivity and treno-bulk-throughput
- Done** Submit framework document describing terms and notions used in the IPPM effort, and the creation of metrics by the working group to the IESG for publication as an Informational RFC
- Done** Submit a document on connectivity to the IESG for publication as a Proposed Standard RFC
- Done** Submit documents on one-way delay and loss to the IESG for publication as Proposed Standard RFCs
- Done** Submit a document on round-trip delay to the IESG for publication as a Proposed Standard RFC
- Done** Publish draft on a bulk transfer capacity metric based on CAP for discussion

Milestones

- Mar 01** Submit framework for bulk transfer capacity to the IESG for publication as an Informational RFC
- Mar 01** Submit draft on loss pattern sample metrics to the IESG for publication as an Informational RFC
- May 01** Submit draft on requirements for a protocol to measure one-way delay and loss
- May 01** Submit draft on metrics for periodic streams to the IESG for publication as a Proposed Standard RFC
- May 01** Submit draft on IP delay variation to the IESG for publication as a Proposed Standard RFC
- Jun 01** First drafts for BCPs on one-way delay and loss

Milestones (cont)

- Jul 01** Submit recommendation to the IESG on whether to advance, recycle, or deprecate RFCs 2678, 2679, 2680, and 2681 (connectivity, loss, & delay)
- Jul 01** Submit draft on bulk transfer capacity metric based on CAP to the IESG
- Aug 01** Submit an informational RFC on ITU and IPPM metrics comparison
- Aug 01** Develop draft for comparison and validity of metrics
- ???** Develop draft for passive application of metrics
