

Smart Notification and Alarm Protocol (SNAP) draft-shapira-snap-03

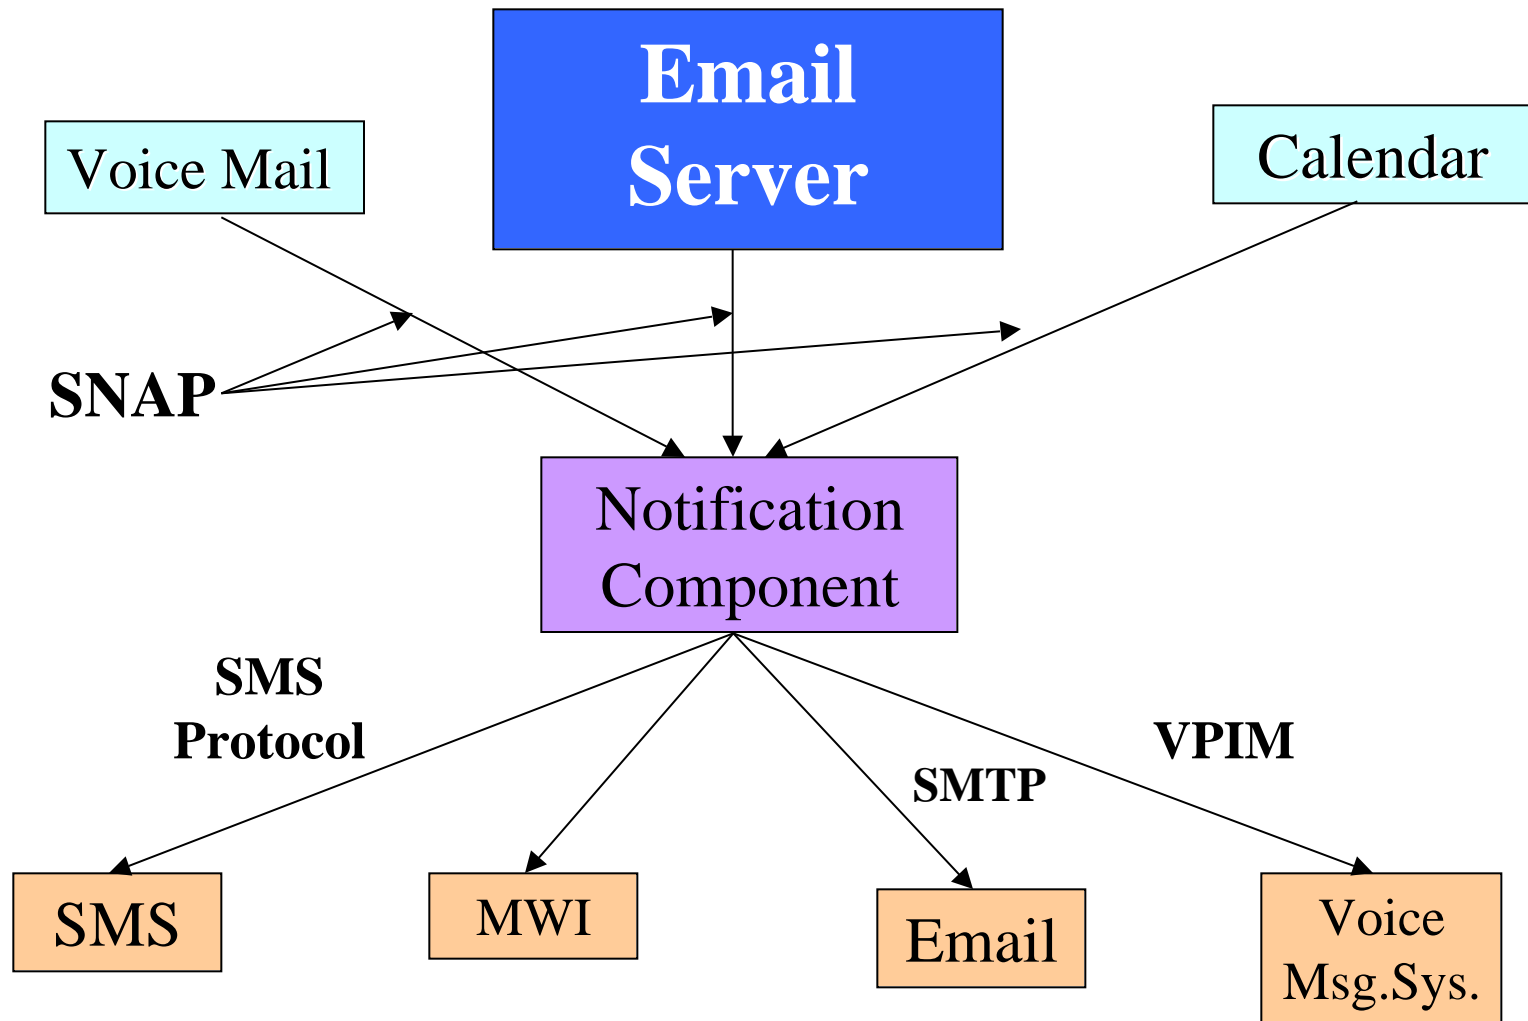

IETF-52 Update

Noam Shapira

Erez Reinshmidt

December 12, 2001

Top Level View

Changes in the current version

- Structural changes in the draft
- Bind HTTP to SNAP
- Payload format is 2822 like
- Added Security and IANA considerations
- MessageType changed to Message-Context (compatible to HINT)
- MsgImportance and MsgSensitivity reference to MIXER (RFC 2156)
- Time format – 2822 like

Why VPIM?

- Notification – a major Unified Messaging feature / component
- VPIM is the natural place for UM discussions
