VPLS Solution using GRE

draft-tsenevir-gre-vpls-01.txt

Tissa Senevirathne

Characteristics

No explicit Tunnel setup required

Only provides semantics to GRE key

Relies on VPN discovery methods for Key distribution

Stateless Tunnels

Issues

Present VPN discovery methods are tied to a specific Tunneling Method (MPLS).

Inability monitor "liveliness" of Remote PE

Proposal

Discovery methods to be generic - attribute to identify associated tunneling Method

VPN application level OAM

Current OAM Proposals are specific to a tunneling method
