On the IPPM MIB

- No comments on mailing list
- People repeat "too complex", don't read
- MIB reviews show complexity, features not normally in MIBs, many optional tables
- Not making much progress (although a lot of work has been done)

Conclusion

- No consensus to continue with current document

- But still a feeling that people are interested in a MIB to report metrics

Plan

- Once again ask for comments
- Bert Wijnen (OPS AD) & Andy Bierman (our MIB advisor) created an base draft of a simpler MIB
- Assuming no consensus on existing draft, but consensus on ideas in base draft, proceed to create MIB around base draft
- Must have an editor, though
- If no consensus, or no interest, drop
