MMS Mappings

- draft-ietf-lemonade-mms-mapping-00.txt
  - Accepted as wg document in Vienna
- Updates (from draft-gellens…)
  - Details on mapping reports (delivery & disp)
  - Importance vs X-Priority
  - Much more detail in Security Considerations
  - Lots of minor fixes
- Ready for Last Call

mms-mapping-00

- Specifies mapping between MMS and email
- MMS similar to email
  - Messages
  - Recipients
  - MIME bodies
- MMS differs from email
  - X-MMS-* headers for envelope and headers

Maps Info Elements

- Core of document is mapping
  - Table and Detailed Text
- For each information element
  - SMTP envelope parameter
  - Internet Message Format header
  - X-MMS- header
- Allows elements to be mapped between email (envelope or header) and MMS

Reports

- MMS delivery and read reports
  - Plain text (not multipart/report format)
  - Subtle differences in when delivery occurs
  - Some differences in states (e.g., deferred)

MMS-Specific features

- Sender address hiding
- Reply charging
