# NEMO
Status and Milestones

T.J. Kniveton

IETF 60

Current Milestones

Done:

Submit terminology and requirements documents (for Basic support).

Submit NEMO Basic Support to IESG

Submit WG draft -00 on Threat Analysis and Security Requirements for NEMO.

Submit WG draft -00 on Multihoming Problem Statement

Submit WG draft -00 on NEMO Basic Support Usages

Apr 04:

Submit Terminology as Informational to IESG [last call - soon]

Submit Goals and Requirements as Informational to IESG [last call - soon]

Submit WG draft -00 on Prefix Delegation for NEMO [?]

May 04:

Submit WG draft -00 on MIB for NEMO Basic Support [starting soon]

Jun 04:

Submit WG draft -00 on Analysis of the Solution Space for Route Optimization

Aug 04:

Shut down or recharter the WG to solve route optimization

Current Charter

- Covers development of Base Support for Mobile Routers and associated documents

- Charters us to investigate Route Optimization and produce draft on solution space analysis

- (Then, re-charter or close down)

- We are approaching that point and should start thinking about WG direction/intentions

What Should WG Do?

- Re-charter? Close up shop after finishing milestones?

- What topics do we want to cover?

  - Route Optimization?

  - Is more work needed (in this WG) on Multi-homing,geo HA distrib.,other topics?

- What problems can we (and do we want to) effectively solve within this specific topic?

To Do..

- Determine future of Prefix Delegation task

- NEMO MIB document into full swing

- Finish up last few open issues with WG docs

- Thanks, see you on the list..
