SDP Media Label

draft-ietf-mmusic-sdp-media-label-00.txt

by O. Levin and G. Camarillo

IETF 61, Washington, DC

Motivation for not referring to the nth media stream

- Static documents that point to media streams described by SDPs that will be created in the future
  - E.g., the media stream with label "1234" corresponds to the video output of the camera pointing at the meeting chair

Status

- Ready for WGLC
